Office Action Summary	Application No. 10/688,734	Applicant(s) SANCHO, ENRIQUE DAVID	
	Examiner John M. Winter	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 32-36, and 40 remain pending.

Response to Arguments

The Applicant's arguments filed on July 28, 2006 have been fully considered, the examiner submits that claims 1-11 are rejected as double patenting over claims 32-36, and 40 of patent application 09/500,601 in view of Ross (US Patent 6,195,447)

See following rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 32-36, and 40 are rejected under the judicially created doctrine of obviousness-type double patenting over claims 16-39 of patent application 09/500,601 in view of Ross (US Patent 6,195,447). Although the conflicting claims are not identical, they are not patentable distinct for the reasons stated below.

As per claims 32-36, and 40 of the present application,

Claims 16-39 of patent application 09/500,601 differ in that they do not disclose a second input unit to communicate with a second server to receive a second server message containing information indicating if a user was verified: a processor to receive the first server message from the first output and the second server message from the second output and to authorize an action only if both the first server message contains information indicating the user computer was verified and the second server message contains information indicating the user was verified wherein the first input unit and the second input unit are the same. Ross ('447) discloses a second input unit to communicate with a second server to receive a second server message containing information indicating if a user was verified: a processor to receive the first server message from the first output and the second server message from the second output and to

Art Unit: 3621

authorize an action only if both the first server message contains information indicating the user computer was verified and the second server message contains information indicating the user was verified wherein the first input unit and the second input unit are the same (Column 4, lines 1-7), (Column 4, lines 25-27)

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the method of patent 09/500,601 with the Ross method in order to allow a redundant transaction to take place.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Winter whose telephone number is (571) 272-6713. The examiner can normally be reached on M-F 8:30-6, 1st Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Fischer can be reached on (571) 272-6779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
